À propos de nous.

RMT Metal was established in Konya in 1985 by Rüstem Mustafa Taşar. Company went into business at first by collecting and sorting scrap in the industry, then it continued to invest and established an alloyed aluminum bar manufacturing facility in 2017 to satisfy and offer the best quality product and service to its clients while keeping up with today's needs and demands. RMT Metal targets to pass over to its clients its 30 years experiment with its latest technology machinery and expert staff. The factory which opened with 5.000 tons per year capacity in 2017 has reached to 7.000 tons per year capacity according to demand and the investments made within the same year. Quality and environment has always been and is always going to be important to us and we have our ISO and environment certificates to prove it.
