

Hakkımızda

Our company, which started out with the production and marketing in the valve sector in 2009 with the title of Turhan valve, stepped into the manufacturing sector with the creative service approach developed on the basis of its knowledge and experience, taking into account the market conditions and technological developments. In line with the demand of the target audience, it started to manufacture products such as irrigation hydrants, suction cups, fire hydrants, irrigation receivers, and check valves. Our basic principle is to continue our work in the light of the ISO 9001 quality system we have established. We take care to work with experienced and qualified personnel in order to ensure the continuation and development of the Total Quality System we have created and to keep customer satisfaction at the maximum level.
